AMGED IBRAHIM MOHAMED BADAWY

JUNIOR FRONTEND DEVELOPER

Cairo, Nasr City, Egypt | 01144649776 | amgedbadawy04@gmail.com
LinkedIn | GitHub

PROFESSIONAL SUMMARY

Junior Frontend Developer and Computer Science graduate focused on building responsive web interfaces with React, Next.js, and TypeScript. Built projects emphasizing reusable UI, clear user flows, Arabic right-to-left (RTL) layouts, and maintainable code. Interested in delivering accessible, user-friendly experiences and growing through hands-on frontend engineering.

TECHNICAL SKILLS

Languages & Web Fundamentals: HTML5, CSS3, JavaScript (ES6+), TypeScript, semantic HTML, DOM fundamentals
Frameworks & Styling: React.js, Next.js (App Router), Tailwind CSS, Bootstrap
React Concepts: Components, props, state, hooks, event handling, forms, conditional rendering, reusable components
CSS & UI: Responsive/mobile-first design, Flexbox, CSS Grid, CSS variables, RTL layouts, typography, visual hierarchy, accessibility fundamentals
Data & Integration: REST API concepts, JSON, asynchronous JavaScript, fetch/API integration concepts, Supabase, PostgreSQL fundamentals
Tools & Workflow: Git, GitHub, npm, Vercel, browser DevTools, ESLint, Vitest, Next.js lint/build workflows
Architecture & Quality: Component-based architecture, separation of concerns, repository/data-access abstraction, route-based pages, search/filtering, loading/error/not-found states, metadata, sitemap, robots.txt, responsive image handling

PROJECTS

Masar — Government Services Guide Live Demo
Next.js, React, TypeScript, Tailwind CSS

- Built an Arabic-first RTL platform explaining government service requirements, steps, responsible authorities, and official sources.
- Implemented service search, category browsing, and dedicated service pages in a responsive layout.
- Organized data through a repository abstraction and included loading, error, and not-found states.

FlowDesk — Workflow Productivity Interface Live Demo

- Developed a responsive web interface for a workflow-productivity concept with clear content hierarchy and navigation.
- Used semantic HTML and modern CSS layout techniques to support desktop and mobile screens.
- Added navigation and interactive UI states for a consistent user experience.

Budgetly — AI-Assisted Household Budgeting System *University Graduation Project*

- Explored a household budgeting concept using AI-assisted recommendations to support spending awareness and food-budget planning.
- Focused on the product concept and user flows; the project did not include frontend development by me.

EDUCATION

Bachelor's Degree in Computer Science 2024
Faculty of Computers and Information Sciences, Mansoura University

CERTIFICATIONS & TRAINING

Frontend Engineering with React — Manara 2025
Front End: HTML, CSS, JavaScript, Bootstrap, ReactJS — CCIC 2023

LANGUAGES

English — Intermediate
Arabic — Native
